# NAO WELCOMES THE PUBLIC

Impress your visitors !

**NAO** is the ultimate humanoid platform and a really impressive robot. For many years, thousands of people around the world had the “Waou effect” when seeing NAO speaking, moving and dancing.

The same kind of funny and attractive behaviors can now be used to entertain your visitors and to communicate the values of your organisation, its services and products.

NAO Welcomes the public is a fully featured behavior where NAO perform a narration, control slides on your computer, play music and videos. The depth camera associated with NAO allows people detection and interactions. NAO knows how many people are in front of him and can act in a smart way. Users can also control the robot with gestures.

No programming is required, you only have to create your slideshow and write the text that NAO will have to say. You are done. **This behavior is part of the HumaRobotics B2B offer**

## HOW DOES IT WORK ?

### Depth Camera:

Detects people around the robot presentation area.

Allows gesture menu navigation

### NAO Robot:

Entertains your visitor ! Can speak, dance, move, look at people and tell jokes. Nao is a great entertainer !

### PC / Screen:

Displays Slideshows, Videos, Navigation menus. Controls the whole behavior

## KEY FEATURES:

### Highly Interactive behavior

Nao can talk, dance, move, look at people in the eyes

### No programming required

Based on usual tools such as Microsoft PowerPoint, Word and Media Player

### Fully Multilingual Software

NAO speaks 15+ languages

### Engage your visitors with Quizzes

Built-in features with gesture control and correction mode

By the designers of: The official training for NAO users, NAO plays Poker & NAO plays Connect 4
